EDUCATION

Bates Technical College | Tacoma, WA

BAS — Computer Information Systems & IT Project Management | Expected June 2028

AAS — Software Development, Data Analytics Focus | Completed June 2026

4.0 GPA · President's List · Phi Theta Kappa

TECHNICAL SKILLS

Data & Analytics: SQL · SQL Server (SSMS) · Star Schema · Data Modeling · KPI Development · Power BI · Tableau · ETL · Stored Procedures

Development: Python · C# · .NET 9 · JavaScript · TypeScript · React · Angular · REST APIs

Operations & Tools: GitHub · Process Design · Technical Documentation · Project Management · Workforce Planning · Stakeholder Communication

TECHNICAL PROJECTS

Hidden Gem Music — Cross-Regional Music Discovery Platform

2026

Stack: SQL Server · Star Schema · .NET 9 · React Native · Power BI · Role: BDA Lead & Project Manager

- Engineered a 28M-row star schema data warehouse across 57 countries; executed mid-project 3NF migration after identifying performance constraints at scale.
- Designed 21 stored procedures across data population and read layers; built a pre-computed summary architecture that completely eliminated runtime fact table queries.
- Defined and validated 4 production KPIs (including Global Overlap Rate and Discovery Gap) through iterative QA against live Recharts dashboard output.
- Directed project management and data architecture for a cross-functional team; enforced branch protection, rigorous PR reviews, and delivery milestones via GitHub.

MyGuitarShop — Role-Based E-Commerce Platform

2025

Stack: C# · .NET Web API · SQL Server · React

- Architected full-stack platform with role-based authentication, REST APIs, and SQL Server stored procedures across inventory, order, and vendor domains.
- Designed normalized relational schema enforcing transactional integrity; built secure, decoupled backend services integrating .NET application logic with SQL Server.

Event Log Analyzer — CLI Monitoring Tool

2026

Stack: Python

- Built CLI tool to parse high-volume event logs and produce structured metrics; implemented sliding-window anomaly detection for failure burst identification.

PROFESSIONAL EXPERIENCE

Independent Contractor — Data & Operations Analyst

May 2025–Present

- Analyzed \$1.18M in annual net sales across 14 months of POS data; built data-backed staffing model with estimated 2–5% labor efficiency improvement representing \$3,300–\$8,400 annualized.
- Identified \$4,000+ in annualized waste from 375 inventory damage-outs via POS log analysis; scoped and delivered a formal proposal for an automated ordering tool.
- Designed a phased React, Python, and PostgreSQL ordering tool architecture featuring an ML-ready data layer and external factor integration.

Assistant Manager & Operational Systems Lead

| Delightful Neighborhood Market | Tacoma, WA

Mar 2023–Present

- Built custom POS-data analytics for staffing and inventory forecasting, reducing product waste and improved scheduling accuracy with no external tooling.
- Authored the comprehensive employee handbook and store operations manual from scratch, delivered print-ready documentation within two months.
- Planned and executed in-store markets and community events that generated consistent 20%+ single-day sales increases while owning full vendor lifecycle and post-event analysis.
- Drove a 20%+ increase in social media engagement through data-informed content strategies, resulting in a measurable in-store sales lift for promoted events.

Administrative Coordinator

| Tacoma Night Market · TAG Festival | Tacoma, WA

April 2022–2023

- Executed TAG Festival across 3 downtown Tacoma museums with 150+ vendors and coordinated 80–100+ vendors per event across monthly Night Market installations; present in executive planning sessions, managed full operational scope from vendor selection through day-of troubleshooting.
